NIGHT WORK BEGINS ON INTERSTATE 293 IN MANCHESTER
BRIDGE AND PAVEMENT REHABILITATION BETWEEN EXITS 1 AND 2

The New Hampshire Department of Transportation announces night construction work is scheduled to begin on Wednesday, April 17 on the rehabilitation of Interstate 293 in Manchester between Exit 1 (South Willow Street) and Exit 2 (Brown Avenue).

This project will include pavement rehabilitation and widening, and the rehabilitation of four bridges over Brown Avenue and Frontage Street.

Lane closures and traffic shifts will be required between the hours of 9:00 pm and 5:00 am on I-293 in order to perform the work. Two lanes of traffic will be maintained both northbound and southbound during daytime hours.

George Cairns and Sons, Inc. of Londonderry, New Hampshire is the contractor for the \$13 million project, which is scheduled to be completed in 2004.
